

New Zealand Whole Soybeans

Since 2021 Pure Oil NZ has been working with local arable farmers to grow New Zealand GE free soybeans. This collaboration has resulted in successful soybean crops which not only provide customers with a local option for soybean sourcing but provide environmental benefits for the farms which choose to grow these crops as part of their rotation. Pure Oil NZ soybeans are available for purchase as whole beans.

Key Benefits

- Premium soybean variety for food
- Big kernels, yellow hilum
- New Zealand grown soybeans are GE free
- Locally grown soybeans do not require heat treatment (which is a requirement of all imported soybeans to ensure their nonviability if planted), therefore providing a fresher bean that has not been “pre-cooked”
- Sourcing locally ensures less “food miles” apply to the finished product
- Traceability: Our Agronomy team work closely with our growers and are actively involved throughout the life cycle of the crop. This support and collaboration enables our growers to grow the highest quality crops, and means our team can trace individual batches right back to the farm they originated

Supply

Whole soybeans are available in 25kg, 1000kg bulk bag or larger bulk shipments.

Typical Analysis	
Protein	38-40% (on dry matter basis)
Moisture	10%
Oil	20%
Origin	New Zealand
GM Status	This product is GE FREE and does not require genetic modification labelling
Organic Status	Conventionally grown (non-organic farming system)
Allergens	Contains soy
Storage	Clean, dry areas away from heat and odorous products
Shelf life	12 months if stored correctly
