

Full Fat Meal

Full Fat Meal is a high energy & high fat protein. Its an energy supplement for beef cattle, dairy and equine diets. This product is effective when included into stock rations for rapid muscle development.

Pure Oil NZ works in partnership with New Zealand arable farmers to grow GE free oilseed rape (canola). The Full Fat Meal is a co-product to rapeseed oil after the seed has been crushed at our Rolleston facility. Pure Oil NZ uses a cold pressing process which means no added chemicals nor heat are applied during the oil extraction process. Meal is supplied freshly pressed to our customers which limits degradation of fats, protein and minerals.

How its made

The cold pressing oil extraction method ensures the co-product meal remains high in essential vitamins, minerals and fat protein. There is no heat nor chemicals used in this extraction process. As our facility is crushing seed year round, meal is supplied fresh which also preserves the nutrients available.

Key Benefits

- Rapid muscle development
- Improved body and coat condition are likely to be observed soon after feeding
- Because of the unique nutrient values of the Full Fat Meal, inclusion rates will not necessarily be large to reach formulation requirements
- Amongst the attributes of the meal are good calcium, magnesium & zinc levels
- Most noticeable is the existence of Vitamin E, when in its natural form this vitamin is absorbed by the animal three times the amount of synthetic E

Available in 20kg bag and full pallet/bulk.

Nutrient	Unit	Measure
Dry Matter	%	95
Crude Protein	%	24
Crude Fat	%	44.5
